

5th EUSAIR Forum
***“Strengthening the Resilience of the Adriatic and Ionian Region
through Cooperation”***

28-29th January
EUSAIR PILLAR 3 – Environmental Quality

Izola, 29 March 2021

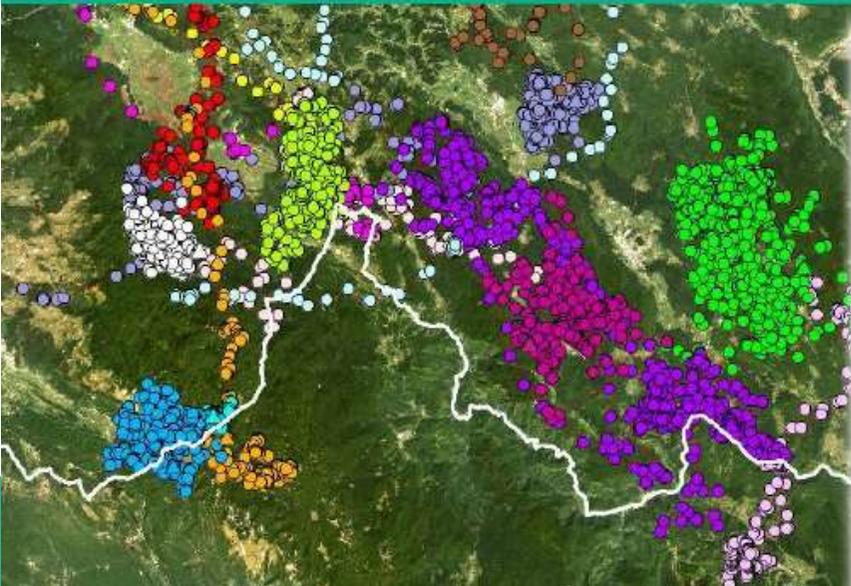

TSG 3 Pillar coordinators:
Mitja Bricelj, PhD
Senad Oprašič, PhD

Importance of blue and green infrastructure in a light of the new EU Post 2020 biodiversity framework: *How to enhance the delivery of essential ecosystem services throughout the Adriatic – Ionian Region?*

- *Klemen Jerina, Biotechnical Faculty, University of Ljubljana,*
- *Dusan Ognjanovic, Ministry of Environmental Protection, Serbia*
- *Mitja Bricelj, EUSAIR Pillar 3 Coordinator, Slovenia*
- *Senad Oprašič, EUSAIR Pillar 3 Coordinator*
- *Duško Cirović, Faculty of Biology, University of Belgrade*
- *Karin Zaunberger, Biodiversity Unit, DG ENV, European Commission*

Functional fragmentation and habitat degradation is one of key threats of LC, and loss of biodiversity!
Occurring at several scales and due to different causes:

NON- harmonized management between countries/management units.

 **LIFE BIODIVERSITY** Operational-level management and conservation of brown bears in southern, eastern, southern and the Alps

Guidelines for Common Management of Brown Bear in the Alpine and Northern Dinaric Region

Action A.6: Elaboration of Common guidelines for population-level brown bear management and management plans for Slovenia and Croatia

August, 2017

Key messages

- **Europe's large carnivores** (such as grey wolf, Eurasian Lynx and brown bear) require extensive well-connected habitats to sustain viable populations and can be thus considered also as convenient umbrella species for conservation of significant proportion of biodiversity in the region and wider. On this note **green infrastructure** is very important in the Adriatic-Ionian region as their landscape provide important habitats for large carnivores, due to its favourable natural predispositions and strategic geographic position.
- Special attention must be given to **the alignment of policies and approaches** across the Adriatic-Ionian region in order to establish the joint management and the **investments in the landscape infrastructure** to support green/blue corridors. This will contribute to the effective management of shared natural resources.
- **Macro-regional strategies should translate the EU policies** in order to mobilize local institutions, cities, agencies, universities, private sectors and civil society towards better implementation of green infrastructure to **foster green and blue corridors**. This will at the same time **halt habitat degradation**, including habitat fragmentation, and with it **the loss of biodiversity** and ecosystem services.
