Argumentation

For the purposes of its Presidency, Slovenia has adapted the basic EUSAIR logo giving it a more »local« character by adding in the background the outline of a lighthouse or bell tower located on the tip of a peninsula (also referred to as a »punta«) of what looks like one of the coastal towns of Slovenian Istria. In addition, the four coloured sails of the EUSAIR logo have been arranged into a »regatta formation« in which all are equal, with the green sail that symbolizes Pillar 3 – Environmental Quality of the EUSAIR Strategy, and which is a priority of the Slovenian Presidency, at the forefront.

In addition, the basic logo contains the wording »Slovenian Presidency« and the Presidency period, 2020–2021.

When to use the logo

Wherever possible, use the basic logo of the Slovenian Presidency, which should always feature the »punta« in the background in a grey raster image.

The version of the logo containing the EUSAIR text element should be used when the logo appears as a stand-alone logo.

The logo can be used in any of the three languages, depending on the target public and location:

- When addressing the Slovenian public only, use the Slovenian version of the logo;
- When addressing the Italian public in a bilingual area, such as any of the municipalities of Slovenian Istria or through any Italian-language media that targets at least one of these areas as one of its primary audiences, the Italian version of the logo should be used;
- When addressing the international public, use the English language version of the logo.

Priorities of the Slovenian Presidency 2020–2021 – Summary

The main theme of the Slovenian EUSAIR Presidency is green connectivity.

I.

The first and foremost priority is **improving quality of life in the coastal areas of our shared sea**

- by concrete changes
- by the implementation of regimes that are based on respect for coastal and marine ecosystem services in the EUSAIR area, especially in the Adriatic eco-region.

This goal can only be achieved:

- through the proactive participation of all stakeholders involved in environmental protection planning and sustainable land use in the Adriatic eco-region
- in the procedures of preparation of spatial plans at all levels (strategic, regional and municipal)
- by connecting, exchanging and building synergies between all four macro-regional strategies (Slovenia is included in three of the four strategies: the Adriatic-Ionian, the Danube and the Alpine).

II.

The second most important priority is the **continuation of the European integration process of the Western Balkans**.

The EUSAIR governance structure offers

- a unique platform for the implementation of the *Green Agenda for the Western Balkans*, which will be at the forefront during Slovenia's Presidency.

III.

The Slovenian Presidency will also be heavily marked by the fact that EUSAIR **will have to address the ongoing challenges related to COVID-19** – particularly in view of the fact that health is a horizontal topic of the strategy. The first such exchange of views will take place within the framework of the *Mediterranean Coast Week* in September 2020.

During an EUSAIR Ministerial meeting held via video conference on 27 May 2020, it was agreed that recovery efforts following the COVID-19 crisis should strive for a »green recovery« in the spirit of the *European Green Deal and the Green Agenda for the Western Balkans*.

IV.

In view of the fact that Slovenia is managing an EUSAIR Facility Point and that a large portion of its activities to date within EUSAIR have been devoted to **strengthening competencies in the field of communication**, one of the priorities of its Presidency will be to bolster communication with key EUSAIR stakeholders and to work with young people in the areas of communication and visibility.
