  - Francesco Parisi Casa di Spedizioni
  - I.CO.P
  - Interporto di Bologna
- **Multipurpose**
  - General & Project Cargo
  - RoRo
  - Container
- **Multimodal** (road – rail – vessel)
- **Expansion** area 1200m \* 750m foreseen
  - Strong rail focus
  - Automation
  - Sustainability
- **People** centric supported by Technology

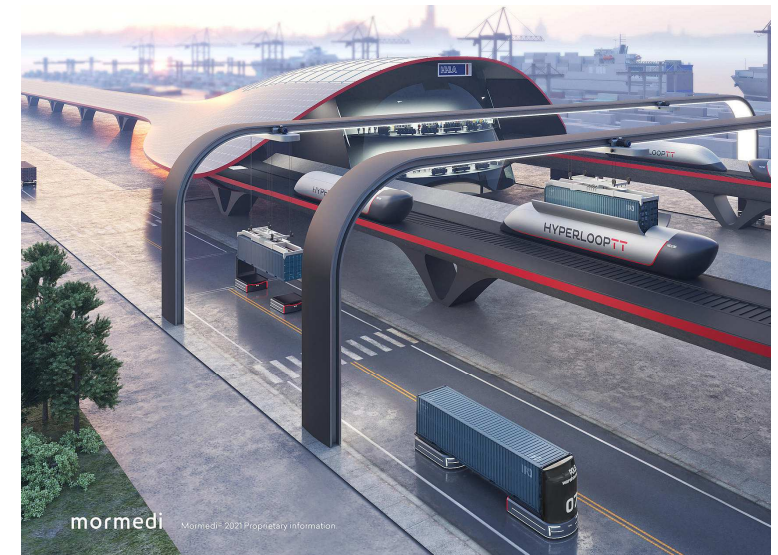

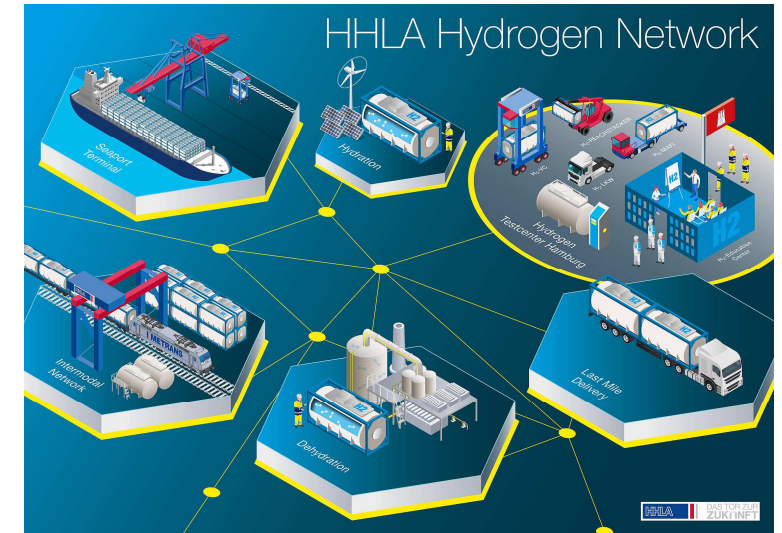

## Aerial view of the new multipurpose terminal HHLA PLT Italy in the port of Trieste that will handle container, RoRo cargo and general cargo

# Green & digital agenda high on the HHLA PLT Italy radar. Vision of integration within the port community.

- **Digital** Incentives today, samples:
  - TOS implementation
  - Port Community Systems
  - Gate technology (OCR)
  - Warehouse Management systems
- **Green** Incentives today, samples:
  - Noise and emission reduction on Reach Stackers/Equipment
  - Electrification of Mobile Harbour Crane
- **Expansion – looking ahead:**
  - HHLA vision of climate neutral terminals by 2040 (incl. PLT)
  - HHLA and hydrogen as fuel source
  - HHLA Sky
  - HHLA HyperLoop & HyperPort

# HHLA PLT Italy, not the terminal of your grandparents.

- **Transition** from muscle to technology
- **Everybody** in the port is using technology (tally clerk, FL drivers, etc.)
- Translation into personnel requirements:
  - People working with systems
  - Common understanding of technology
  - Process thinking
  - Experts in Systems, Equipment & Automation
  - Experience in port energy solutions
  - Understanding of sustainability
- Suggestions towards education:
  - Process concepts & mapping
  - Understanding of technology & IT
  - Understanding of energy & sustainability
  - Focus on Targets
  - Soft skills development
