

EUSAIR bringing
the Green Deal to the region

in cooperation with

UNIVERSITÀ
DEGLI STUDI
DI PADOVA

The use of European standards and regulations towards strategic environmental management

Second of a series of three workshops organized by Forum of the Adriatic and Ionian Chambers of Commerce, in collaboration with the University of Padua.

These workshops are financed by the DG REGIO in the context of the project "EUSAIR bringing the Green Deal to the region", which aims to support the adoption of more sustainable practices in the organization of EUSAIR meetings.

This second workshop will present the structure of environmental standards and their potential application into Green Public Procurement (GPP).

It will help participants better understand procedures, environmental management standards and EU Environmental schemes such as EMAS regulations.

Finally, the aim is also to encourage the EUSAIR community to take part in the 'Big Buyers for Climate and Environment' initiative, which facilitates exchanges among buyers committed to GPP implementation.
