**10:00-15:00 BILATERALNO SREČANJE PROJEKTA MSPMED - SEVERNI JADRAN: SLOVENIJA-ITALIJA (samo za vabljenе - potrebna registracija - RRC KOPER)**

Dogodek bo priložnost za izmenjavo nacionalnih pomislekov glede glavnih značilnosti in uporab na tem območju, in sicer turizma in pomorskega prometa ter njune interakcije z varstvom biotske raznovrstnosti in drugimi morskimi rabami. Čezmejno območje Slovenija-Italija je pomembno zaradi svojih okoljskih vidikov in tržne vrednosti, o čemer poroča na primer dokument akcijskega načrta UNEP MED iz leta 2015. Območje je pomemben prehranjevalni in prezimovalni habitat za želvo beloglavko ter ključni habitat za pelagične morske ptice, vključno z redkim evropskim viharnikom.

Obalni in križarski turizem sta prepoznana kot pomembna gospodarska in razvojna dejavnika na območju. Pomorski promet na območju dobrin je intenziven, saj so na obali pomembna pristaniška mesta, kot so Trst, Benetke in Koper, medtem ko je križarjenje zelo pomembno za celotno območje. Dogodek bo priložnost za izmenjavo nacionalnih izkušenj pri izvajanju načrtov v okviru omenjenih tematik in za njihovo vpeljevanje v prihodnje širše strategije sodelovanja. Teme, ki bodo obravnavane na dogodku, so: pomen turizma in pomorskega prometa na območju v okviru slovenskega in italijanskega PPN; z dokazi podprta vprašanja v zvezi z rabami morja (vplivi in konflikti), analitična orodja za podporo analizi vplivov in konfliktov v PPN, možne skupne pobude za spodbujanje sožitja med rabami morja, kot so turizem, pomorski promet in morski ekosistemi, biotska raznovrstnost na območju.

**MSPMED PROJECT BILATERAL MEETING - NORTHERN ADRIATIC SEA: SLOVENIA-ITALY (by invitation only - registration needed - RRC KOPER)**

The event will be the occasion to share national concerns regarding main features and uses happening in the area, namely tourism and maritime transport and its interaction with biodiversity protection and other maritime uses. The Slovenia-Italy transboundary area is of relevance for its environmental aspects and commercial value, as reported for example by the UNEP MED Action Plan document of 2015. The area is an important foraging and overwintering habitat for the loggerhead turtle, and key habitat for pelagic sea birds, including the rare European storm petrel. Coastal and cruise tourism are recognised as important economic and development factors in the area. Maritime traffic of goods area is intense, since important port cities such as Trieste, Venice and Koper are present on the coast and cruising is of high relevance for the entire area. The event will be a moment to share national experiences of plan implementation of these topics, and frame them in future broader cooperation strategies. Topics to be addressed in the event are: relevance of tourism and maritime transport in the area within the Slovenian and Italian MSP; evidence-based concerns related to maritime uses (impacts and conflicts), analytical tools to support impact and conflict analysis in MSP, possible common initiatives fostering the coexistence between maritime uses such as tourism, maritime traffic and marine ecosystems, biodiversity in the area.

**13:00-16:00 DELAVNICA TSG3, 2. DEL - PET HAB ECO; KAKO IZ TSG 3 FLAGSHIP PROJEKTOV RAZVITI MAKROREGIONALNE EUSAIR PROJEKTE V OKVIRU DOLGOROČNEGA PRORAČUNA EU ZA OBDOBJE 2021-2027 (potrebna registracija - FP EUSAIR)**

Drugi del delavnice je namenjen predstavitvi in nadaljnemu razvoju odobrenega strateškega flagship projekta EUSAIR TSG3 PET HAB ECO - varstvo in izboljšanje naravnih habitatov in kopenskih ekosistemov. Splošni cilj je izboljšati odpornost populacij velikih zveri na nadnacionalni ravni na območju, za katerega so značilni ekosistemi, ki jih obvladuje človek ali so razdrobljeni, ob okoljskih grožnjah in tveganjih, vključno s tistimi, ki jih povzročajo vplivi podnebnih sprememb. Posebna pozornost vodilne pobude je namenjena ekološki povezanosti modrih in zelenih koridorjev/infrastrukture. Delavnica bo vključevala okrogle mize, na katerih bodo potencialni partnerji in druge zainteresirane strani predstavili svoje lokalne in nacionalne cilje, povezane z ohranjanjem velikih zveri, vrzeli ter dobre prakse in projekte, ki jih je treba izkoristiti. Delegirani bodo predstavili predloge lokalnih in čezmejnih pilotnih ukrepov za izboljšanje odpornosti populacij velikih zveri, sobivanja, upravljanja in ekološke povezanosti njihovih habitatov.

The overall objective is to improve the resilience of large carnivore populations on a transnational scale in an area characterized by human-dominated or fragmented ecosystems in the face of environmental threats and risks, including those caused by the impacts of climate change. The particular attention of the flagship is given to the ecological connectivity of blue and green corridors/infrastructure. The workshop will include roundtable presentations from potential partners and other stakeholders to present their local and national goals related to the conservation of large carnivores, gaps, and good practices and projects that should be capitalized. The stakeholders will present proposals of local and transboundary pilot actions to improve the resilience of large carnivore's populations, coexistence, management, and ecological connectivity of their habitats.

**9:00-13:00 ZELENI PREHOD IN MAKROREGIJE**  
(potrebna registracija - FP EUSAIR)

*Klimatske spremembe in degradacija okolja predstavljajo eksistencialno nevarnost državljanom Evropske unije in svetu. Evropski zeleni dogovor naslavlja tovrstne izzive z namenom, da bi jih premagali. Zeleni dogovor pomeni tudi novo strategijo Evrope za rast, ki bo spremenila gospodarstvo Evropske Unije v konkurenčno ter moderno in učinkovito pri rabi virov. Med cilji evropskega zelenega dogovora so tudi prehod Evrope v klimatsko nevtraln do leta 2050, spodbujanje zelenih tehnologij v gospodarstvu, vzpostavljanje trajnostne industrije in prometa ter zmanjšanje onesnaženja. Kateri so torej ukrepi za zeleni prehod? Kaj pomeni zeleni prehod in kako je povezan z krožnim gospodarstvom? Kateri vertikalni in horizontalni ukrepi ga spodbujajo? Kateri dobre prakse v regiji poznamo? Kateri scenariji razvoja naše regije so možni z ali brez zelenega prehoda? Namen dogodka je nadgraditi sposobnosti deležnikov v regiji v sklopu obstoječih virov in ustvariti skupno znanje kako lahko makroregionalne strategije spodbudijo zeleni prehod.*

**GREEN TRANSITION IN MACRO-REGIONS**  
(registration needed - FP EUSAIR)

*Climate change and environmental degradation are an existential threat to the European Union and to the whole world. The European Green Deal addresses such challenges with the aim of overcoming them. At the same time, Green Deal is Europe's new growth strategy, which will transform the economy of the European Union into a more competitive, modern and efficient in the use of resources. The Green Deal is aiming towards transition in climate neutral Europe by 2050, boost of green technology in the economy sector, creation of sustainable industry and transport and cut of pollution. But what are the measures to take for actual green transition? What does green transition mean and how is it connected to circular economy? What are the horizontal and vertical measures supporting it? What are the best practices across the region? What are the scenarios of our future with or without the green transition? The purpose of the event is to build our capacities in terms of existing resources and generate our joint knowledge on how macro-regional strategies contribute to green transition.*
